

DXG DX SERIES

Data Safe

Cleared the severe conditions against high temperature for computer media storage. EIKO original, Dual structure firmly protects from extreme heat.

One hour fire resistant performance for Flexible computer disk

Passed TS-15 Tool-proof test <DXG-200 only>

Paint color [817]

Now, personal computer has become familiar to us as communication tool for business and private. Furthermore, by digitization such as television or camera, memory media needs large-volume data. Data safe is suitable for protecting a variety of valuable information like memory picture kept in compact media or corporate asset from fire or theft.

FEATURES

Burglary resistant performance * This tool-proof test belongs to fire resistant safe, not burglary resistant safe.

Passed TS-15 Tool-proof test <DXG-200 only>

Most of safecrackers attempt "Forced open a safe" by using specific tools like crowbar and metal cutting saw etc. for safe door in a short time. The test is conducted on the assumption of the attacks such as cutting hinges and forced-open the door for 15 minutes.

Judgment Safe door can not open and time of attack test is over 15 min.

* Time of attack does not include the time of preparing and changing tools, learning method of attacks and taking a rest.

Special construction for door

The construction lowers the heat from the gap of door and prevents attacks directly to the locking bolt from forced-open the door. It enhances the fire and burglary resistant performance comparing with similar grade of products.

Special construction type

General type

Fire resistant performance

One hour fire resistant performance for Flexible computer disk

Passed "Standard heating test" in JIS and designed to maintain the inner temperature less than 52°C and the inner humidity less than 80% for one hour after fire.

Judgment

Fire resistant performance for Flexible computer disk

Inner temperature limit is less than 52°C and humidity limit is less than 80%.

Fire resistant performance for general paper
Inner temperature :
Less than **177°C**
Inner humidity :
No standard

Data safes for Flexible computer disk
Inner temperature :
Less than **52°C**
Inner humidity :
Less than **80%**

In case of fire, data of computer media is lost around 60°C. So, the valuable data may disappear if you keep in general fire resistant safes (inner temperature standard; less than 177°C).

Special construction

We have developed "Special insulation materials" that provides a barrier against extreme heat. The dual wall construction of the special insulation materials and its board will enhance fire resistance.

LOCK

Cylinder key lock

Dimple reversible key

The dimple key is reversible and simple operation. But it is very difficult to duplicate the key and has high security.

Installed re-locking device <DXG-200 only>

It will operate automatically if the dial lock is forced-open by tools, and the door will remain firmly closed.

LINEUP

DXG  

DXG-200

Outside Dimensions: W706 x D790 x H1,085(mm)
 Inside Dimensions: W470 x D476 x H800 (mm)
 Weight: 375kg Capacity: 179 ℓ
 Accessories: 2 sliding shelves

[OPTION] Sliding shelf For DXG-200

Effective dimensions of shelf: W425 x D436 x H49(mm)
 * With sliding rail

DX series 

DX-101

Outside Dimensions: W486 x D550 x H388(mm)
 Inside Dimensions: W250 x D252 x H150 (mm)
 Weight: 86kg Capacity: 9.4 ℓ
 Accessories: 1 shelf

DX-103

Outside Dimensions: W486 x D550 x H711(mm)
 Inside Dimensions: W250 x D252 x H440 (mm)
 Weight: 146kg Capacity: 27.6 ℓ
 Accessories: 2 shelves
